Global  
constants  
none

Function  
Prototypes:  
float stockProfit  
(float, float,  
float, float,  
float);

Main

float ns, sp,  
pc, sc, pp

Enter ns, pp,  
pc, cp, sc

stockProfit (ns,  
pp, pc, sp, sc)

Calculates profit or  
loses:  $p = ((ns * sp) - sc) - ((ns * pp) + pc)$

returns p
